A REVOLUTIONARY INGREDIENT

The secret to Lamiderm Apex is in our proprietary LifePharm® Fertilized Avian Egg Extract.

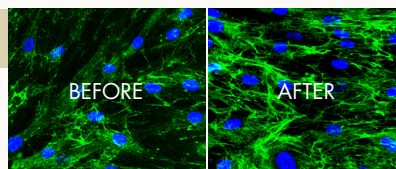

The LifePharm Egg Extract is a unique skin cell activator. It's powered by two growth factors and the lysyl oxidase (LOX) enzyme. Together, these components stimulate skin cells to produce collagen, elastin and fibronectin.*

Our Egg Extract with LOX has been shown to boost collagen, elastin and fibronectin by up to 350 percent in just three days.^{†*}

While most serums only target collagen, elastin or fibronectin, Lamiderm Apex targets all three to help your skin look and feel its best.
