# IMMUNE+++ HELPS SKIN LOOK AND FEEL YOUTHFUL

*Not for Distribution*

# DOES YOUR SKIN LOOK AND FEEL YOUTHFUL THIS SUMMER?

LIFE PHARM GLOBAL NETWORK

*Not for Distribution*

## IT'S IMPORTANT TO LIMIT EXPOSURE TO THE SUN DURING THE SUMMER

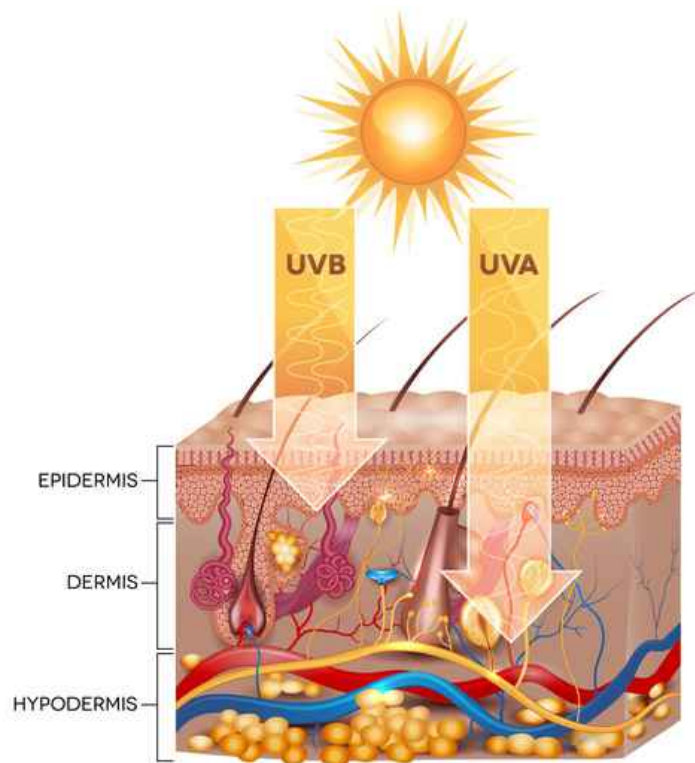

- Sun's rays are more direct and days are longer
- Too much sun is harmful and also affects immune responses

# ULTRAVIOLET (UV) LIGHT IS RESPONSIBLE FOR 50 PERCENT OF FREE RADICAL DAMAGE

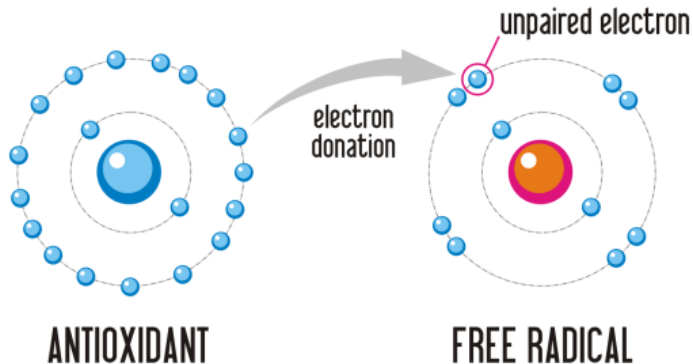

- May cause the skin to age and form wrinkles
- May lead to severe abnormalities within the skin cells
- May lead to lack of formation of collagen and elastin, which give skin its thickness and smoothness
- May lead to inflammation that accelerates skin's aging

# THE BODY HAS DEFENSE MECHANISMS TO HELP COMBAT FREE RADICAL DAMAGE

- By producing its own internal antioxidants
- By using other antioxidants obtained from the diet, such as vitamin E, vitamin C and CoQ-10
- Antioxidant defense mechanisms can be inhibited by UV light
- Antioxidant defense mechanisms decrease during the natural aging process

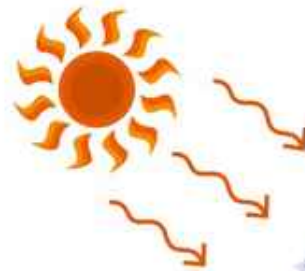

# WHAT CAN YOU DO

## TO COUNTERACT SUN DAMAGE TO THE SKIN?

- Take IMMUNE+++ — the vitamin C in the Life-C Blend in the formula is essential for the synthesis of collagen and neurotransmitters that support the cross-linking function to give skin its thickness, elasticity and smooth appearance
- Vitamin C in the Life-C Blend is shown to help protect skin cells against UV damage, especially when red and orange pigments found in certain fruits are included. The Life-C Blend in IMMUNE+++ contains herbs and botanicals with red and orange pigments
- Life-C Blend contains red and orange fruits such as camu camu, acerola and pomegranate, rich sources of flavanones, anthocyanins, citrus bioflavonoids and polyphenols, all of which counteract free radical damage

## WHAT CAN YOU DO TO SLOW THE AGING PROCESS OF THE SKIN?

- Wear sunscreen, hats and long sleeves to reduce sun exposure, especially between 11 am and 3 pm
- Take LifePharm Global dietary supplements

# WHY TAKE IMMUNE+++ TOGETHER WITH LAMININE OMEGA+++?

STUDIES HAVE SHOWN:

- Vitamin C taken with a fish oil supplement and two other antioxidants increased the deposit of new collagen fibers in the dermis of post-menopausal women.
- Long-term use of vitamin C and fish oil supplements produced clinically measurable improvement in the depth of facial wrinkles

## AMOUNT OF VITAMIN C YOU TAKE MAY MAKE A DIFFERENCE

- Radical scavenging ability increased by 22 percent when consuming 100 mg per day of vitamin C and 37 percent when consuming 180 mg per day (A single tablet of IMMUNE+++ contains 500 mg of vitamin C)
- Clinical studies have shown vitamin C helps rebuild injured skin:
  - + Physicians administered daily dosages of 500 to 3,000 mg of vitamin C to subjects recovering from various types of wounds
  - + Those who received vitamin C recovered much more quickly than those who did not

# ALL FOUR LPGN DIETARY SUPPLEMENTS CAN PROMOTE HEALTHY, YOUTHFUL LOOKING SKIN:

- IMMUNE+++ is not only a rich source of high quality vitamin C but also of immune-boosting ingredients
- Laminine OMEGA+++ contains the necessary omega fatty acids in the right ratios to support collagen growth
- DIGESTIVE+++ supports gut health, which affects skin health
- Laminine targets problem areas and enhances the benefits of the other supplements
